25 YEARS OF EXPERIENCE

# CHEMICALS

## COMPANY PRESENTATION

TECO CHEMICALS is a specialized supplier of cleaning chemicals, tank cleaning solutions and test equipment for the maritime industry.

TECO CHEMICALS have been supplying reliable chemicals, equipment and services since 1994

Our main object is:

*Minimize Turnaround Time and Optimize Flexibility*

To achieve this we focus on planning, knowledge and training combined with the right equipment and chemicals.

We believe that our know-how, personal service and good logistics combined with a dedicated staff are vital factors in today's competitive shipping market.

# MARCLEAN

MARINE & OFFSHORE CLEANING DETERGENT

MarClean is our own range of Marine and Offshore cleaning Chemicals. MarClean Chemicals were successfully introduced in 1994 as Soot and CPP cleaners for zinc, epoxy and Stainless Steel tanks. Today the MarClean range consists of highly concentrated, environmentally friendly products suitable for tankers and dry bulk vessels. We constantly evaluate our range of cleaning agents and are committed to develop cleaning solutions for the future.

TECO supply our products in more than 30 countries in all continents of the world. We ensure delivery of high quality, IMO approved chemicals at competitive prices from joint stocks and production facilities. This adds flexibility to our operation, and gives our clients better predictability in supply and planning of cleaning operations. As an example one of our concentrated products, MarClean SC covers an impressive range of cleaning requirements on a modern tanker or dry bulk vessel.

# CONSULTANCY & SUPERCARGO

By combining our staff with a worldwide network of master mariners, chief officers, superintendents, surveyors, chemists, port captains and supercargoes, we are able to be of service where and whenever it is needed.

Increased trades of **palmoil**, **softoil** and **biofuel** give opportunities for more vessels to swoop in and out of these trades. New buildings are loading palmoils on the maiden voyage to cure the coating often with a crew used to only carrying CPP. **Methanol** and other high spec cargoes can also be a challenge.

A supercargo can and will make a difference, being pre-planning of cargo operation, tank cleaning and **trouble shooting**. Just by using their abilities to assess and monitor difficult situations and provide correct information make them a valuable asset to the companies they represent, being the owners, charterers, pool or commercial operator.

# WHY TECO?

High Quality Products

Competitive Prices

IMO, MARPOL Coating & Manufacturer Approved

World Wide Distribution

Short Response and Lead Time

Dedicated Experienced Staff
