TECO Valkyr 280

High Pressure Cleaner

25 Years of High Quality Cleaning Chemicals

Quality Without Compromise

Description:

By having 30 years of running experience in the cargo hold- and tank cleaning industry for the maritime sector, TECO Chemicals have broad experience in successfully delivering key solutions, products, and services to its world wide customer base.

“Valkyr – Decisive power.” Inspired by the Norse Valkyries, symbolizing strength, precision, and high-pressure performance.

TECO Valkyr 280:

The TECO VALKYR 280 is part our next-generation high-pressure system engineered to deliver exceptional performance in demanding marine environments.

Operating at up to 280 bar, the VALKYR 280 is the smallest unit in our HPC range, while still delivering enough power to handle most cleaning tasks. Thanks to its lower operating pressure, it is often the preferred choice for cargo hold cleaning gangs.

This makes the VALKYR 280 particularly well suited for ship-based operations, where maintaining pressure stability is critical for efficient cleaning and surface preparation.

To withstand harsh operating conditions, the VALKYR 280 is built with a stainless steel frame, providing enhanced durability and protection against corrosion and mechanical impact in demanding marine environments.

Built with reliability and longevity in mind, the VALKYR 280 offers a robust solution for high-pressure tasks while minimizing dependency on high water volume availability.

TECO Valkyr 280 – Technical Specifications

280 bar	18 L/min	440 V / 60HZ
MAX. PRESSURE	FLOW @ 60 HZ	POWER SUPPLY

System Information

Model / Type	TECO Valkyr 280
Operation	High Pressure Cleaner

Kit Contents

- HPC 280 Bar with 25 m electrical cable attached
- 1 × 25 m Electrical Cable
- 3 × 20 m High Pressure Hose
- 1 x HP Lance with flat nozzle attached
- 1 x HP Lance with turbo nozzle attached
- 1 x Trigger Gun

SYSTEM HIGHLIGHTS

Operating at up to 280 bar, the VALKYR 280 is the smallest unit in our HPC range, while still delivering enough power to handle most cleaning tasks. Thanks to its lower operating pressure, it is often the preferred choice for cargo hold cleaning gangs.

TECO Valkyr 350

High Pressure Cleaner

25 Years of High Quality Cleaning Chemicals

Quality Without Compromise

Description:

By having 30 years of running experience in the cargo hold- and tank cleaning industry for the maritime sector, TECO Chemicals have broad experience in successfully delivering key solutions, products, and services to its world wide customer base.

“Valkyr – Decisive power.” Inspired by the Norse Valkyries, symbolizing strength, precision, and high-pressure performance.

TECO Valkyr 350:

The TECO VALKYR 350 is part our next-generation high-pressure system engineered to deliver exceptional performance in demanding marine environments.

Operating at up to 350 bar, the VALKYR 350 is specifically designed for applications where high pressure is required, even though water flow is low onboard. This makes the VALKYR 350 particularly well suited for ship-based operations, where maintaining pressure stability is critical for efficient cleaning and surface preparation.

This makes the VALKYR 350 particularly well suited for ship-based operations, where maintaining pressure stability is critical for efficient cleaning and surface preparation.

TECO Valkyr 500

High Pressure Cleaner

25 Years of High Quality Cleaning Chemicals

Quality Without Compromise

Description:

By having 30 years of running experience in the cargo hold- and tank cleaning industry for the maritime sector, TECO Chemicals have broad experience in successfully delivering key solutions, products, and services to its world wide customer base.

“Valkyr – Decisive power.” Inspired by the Norse Valkyries, symbolizing strength, precision, and high-pressure performance.

TECO Valkyr 500:

The TECO VALKYR 500 is our next-generation high-pressure system engineered to deliver exceptional performance in demanding marine environments.

Operating at up to 500 bar, the VALKYR 500 is specifically designed for applications where high pressure is required despite limited or unstable water supply. By operating at a lower flow rate, the system ensures consistent performance even under the varying and often restricted flow conditions found onboard vessels.

This makes the VALKYR 500 particularly well suited for ship-based operations, where maintaining pressure stability is critical for efficient cleaning and surface preparation.

To withstand harsh operating conditions, the VALKYR 500 is built with a stainless steel frame, providing enhanced durability and protection against corrosion and mechanical impact in demanding marine environments.

Built with reliability and longevity in mind, the VALKYR 500 offers a robust solution for high-pressure tasks while minimizing dependency on high water volume availability.
